Hands-On AI Coaching | Seiichi Tanaka

5AI	30yr	20+	15+
Orchestration	STEM Teaching	React PWA Apps	MCP Integrations

Understanding Your Vision

You want to build AI product literacy — not become a software developer. This is exactly my specialty. I help non-technical professionals harness Claude Code, GitHub, and AI assistants to build real prototypes, automate workflows, and communicate effectively with technical teams.

As a 30-year STEM educator, I know how to teach complex concepts through hands-on practice, not theory-heavy lectures. My approach is project-based: you'll build real things from Week 1.

Mentoring Curriculum

Module 1: AI-Assisted Building

- Claude Code setup & workflow mastery
- Vibe coding: natural language → working apps
- Prompt-to-code pipeline techniques
- Building small AI apps hands-on

Module 2: GitHub & Collaboration

- Git fundamentals (repo, commit, branch)
- Pull request workflow for teams
- Code review with AI assistance
- Cloud coding environments

Module 3: AI Assistants & Agents

- Multi-AI orchestration (Claude+GPT+Gemini)
- Structured prompting & communication
- AI agent workflows & automation
- MCP server integration basics

Module 4: Workflow Automation

- Internal tool & workflow automation
- Simple prototype building process
- Tech team collaboration frameworks
- Continuous AI learning strategies

Why Seiichi Tanaka?

30-Year STEM Education Expert

Professional educator specializing in making complex technology accessible to all learners. Proven track record of transforming struggling students into confident achievers.

5AI Orchestration Pioneer

Unified Claude + Gemini + ChatGPT + Grok + Manus into a single production workflow. Deep real-world experience with multi-AI system design and deployment.

Hands-On Builder, Not Just a Talker

Built 20+ React PWA applications in one week with minimal bugs. 15+ MCP server integrations in production.
Not just theory — proven, tangible results.

API & Full-Stack Specialist

Bybit API trading systems, Pine Script development, full-stack web apps across Python, JavaScript, and C++.
Real production-grade API architecture experience.

Mentoring Pipeline

Weekly Session Plan

Week	Focus Area	Deliverables	Hours
Week 1-2	Claude Code & Vibe Coding	First AI-built prototype, dev setup	8-10
Week 3-4	GitHub & Version Control	Personal repo, first PR, workflow	8-10
Week 5-6	AI Assistants & Agents	Multi-AI workflow, prompt library	8-10
Week 7-8	Automation & Integration	Automated workflow, documentation	8-10
Week 9-12	Advanced & Independent	Complex builds, growth plan	6-8

Mentoring Approach

Live Coding
Real-time pair programming sessions

Project-Based
Learn by building real applications

Async Support
Code review & Slack/email support

Custom Pace
Adapted to your learning speed

Screen Share
Visual guidance for every concept

Resource Kit
Curated docs, templates & guides

Proven Track Record

Project	Technology	Result
5AI Orchestration System	Claude, Gemini, GPT, Grok, Manus	Multi-AI unified workflow
20+ Education PWA Apps	React, Vite, TypeScript, Tailwind	Built in 1 week, minimal bugs
Bybit Trading Platform	Python, API, WebSocket	Live trading automation
STEM Education (30 yrs)	K-12 to university level teaching	E-grade to university success
MCP Server Integrations	15+ servers, TypeScript, Python	Production MCP ecosystem
